You **cannot** delete files after they've been uploaded, whether you uploaded them or they were sent to you by Farkouh, Furman & Faccio, LLP. You can, however, use the **Request for Deletion function**. Click the box to the left of the file name, then click the **More Options** (ellipsis) button, and choose **Request for Deletion**. You will be prompted for confirmation; click **Yes** to confirm your deletion request.

An email will then automatically be sent to Farkouh, Furman & Faccio, LLP notifying us that you're requesting deletion of files. You can bulk select multiple files at the same time to request deletion.

Checking Out Files

Collaborate with Farkouh, Furman & Faccio, LLP by using the **Check Out** feature to download a file, make changes, and then add the modified file back to Client Axcess. The file will be overwritten to reflect your changes upon Check In. *Note that this function only works for files you've sent*.

Advanced Features

This section is intended to provide further assistance on the more complex features available to a Portal Admin user. The advanced features are optional, and are not required for each Client Axcess portal.

Portal User Roles

Portal Admin

The Portal Admin is the primary user for each Client Axcess portal. The Portal Admin may perform all portalrelated functions, create other Portal Users and control access for other Portal Users. The Portal Admin user will be the only user that exists initially when a portal is created.

Portal User

A Portal User is created and granted access by the Portal Admin or the firm. Portal Users should only be created when Portal access is required by more than one person.

Example of Advanced Portal Use

- You may find situations in which it is practical to grant portal access to a third party. For example, a banker or advisor with whom you and the firm collaborate on a regular basis. Before having access to Portal; options to exchange information included email, fax, CD-ROM, or hard copy paper, and in many cases you had to request the document from the firm before you could provide it to the bank. As the Portal Admin, you may create a Portal User allowing your banker access to requested documents and the ability to add files at the request of you and the firm; considerably reducing the time and resources spent to exchange information. The security level of Portal far exceeds email, which is most often the primary medium of exchanging electronic files.
- If the firm has created more than one portal for you, you will be able to control which portal(s) your banker or other third party may view.
- Your firm's portal solution may or may not provide you with the ability to secure folders. If available, this feature allows the Portal Admin to control a Portal User's access to one or more folders within a portal.

Managing Portals

The Portal Admin may grant portal access to others by creating Portal Users.

There are three steps to create Portal Users:

- 1. Create the Portal User
- 2. Grant the Portal User access to one or more portals
- 3. Choose the Portal User's File Management Role for each portal they are granted access

About File Management Roles

There are five File Management Roles that can be assigned:

- 1. Administrator allows Portal Users to perform all file operations.
- 2. Standard User allows Portal Users to perform the most common file operations.
- 3. Limited User allows Portal Users to perform a limited number of file operations.
- 4. Read-only User allows Portal Users to download files and review related information.
- 5. Upload-only User allows Portal Users to upload files and review related information.

It is our recommendation that Administration rights NOT be granted to Portal Users.
